Professional Summary

Python Backend Developer with a Master of Computer Applications (MCA) and hands-on experience building web applications using **Flask** and **Django**. Skilled in REST API development, database design, authentication systems, and responsive web applications. Experienced with Python, SQL, JavaScript, Git, and modern development workflows through academic, internship, and personal projects.

Technical Skills

Languages: Python, Java, SQL, C, JavaScript

Backend Development: Flask, Django, REST API Design, Authentication, CRUD Operations, Backend Architecture

Frontend Development: HTML5, CSS3, JavaScript, Bootstrap 5, Responsive Web Design

Databases: SQLite, MySQL, MongoDB, Oracle DB

ML / Data Science: Scikit-learn, Pandas, NumPy, Feature Engineering, Data Preprocessing, Predictive Modeling

Tools and Platforms: Git, GitHub, Postman, VS Code, Render, Jupyter Notebook

Core Concepts: OOP, MVC Architecture, Version Control, Agile Workflow, DBMS, Data Structures and Algorithms

Work Experience

Python Developer Intern

Sep 2025 – Oct 2025

Codec Technologies Pvt. Ltd. (AICTE Approved)

Remote

- Engineered Python modules for internal tooling by applying OOP principles and PEP-8 standards, producing clean, maintainable, and production-ready code.
- Refactored legacy scripts across multiple components, improving code modularity and reducing long-term maintenance overhead.
- Debugged and resolved software issues through systematic testing and root-cause analysis in production-simulated environments.
- Collaborated using Git and GitHub version control workflows, following branching strategies and best practices throughout the development lifecycle.

Projects

EV Yatra | *Flask, Python, SQLite, HTML5, CSS3, JavaScript*

2026 – Present

- Developing a full-stack electric scooter rental platform for students and daily commuters with booking, availability tracking, and rental history management features.
- Implemented user authentication and role-based access control supporting Customer and Admin modules with secure session management.
- Designed a normalized relational database schema using SQLite to manage users, scooter inventory, and booking records with full CRUD operations.
- Built RESTful backend routes in Flask ensuring clean, maintainable communication between the JavaScript frontend and Python backend.
- Developing an Admin dashboard (in progress) for real-time scooter management, booking oversight.

Student Analytics System | *Python, Flask, Scikit-learn, Pandas, NumPy, HTML, CSS, JavaScript*

2026

- Built an end-to-end machine learning pipeline covering data ingestion, feature engineering, model training, and Flask REST API deployment to predict student academic outcomes.
- Applied classification algorithms including Logistic Regression and Random Forest via Scikit-learn, evaluating performance using precision, recall, and F1-score metrics.
- Deployed Flask backend serving real-time model predictions to a JavaScript frontend with data visualization and performance trend analysis.
- Engineered features from raw academic datasets using Pandas and NumPy, streamlining preprocessing for reproducible model training.
- **Live Demo:** student-analytics-qv2d.onrender.com

- Tara’s Timebound Tasks | Django, Python, HTML5, CSS3, JavaScript2025
- Developed and deployed a task management web application featuring task creation, deadline tracking, and real-time countdown timers.
 - Designed RESTful URL routing and Django ORM models to build a scalable, maintainable backend architecture supporting concurrent users.
 - Implemented responsive user interface using HTML5, CSS3, and JavaScript with cross-browser compatibility.
 - **Live Demo:** sourabhchetan.github.io/tara-to-do-list

Education

Master of Computer Applications (MCA) <i>IMS Engineering College, Ghaziabad</i>	2024 – 2026 AKTU
Bachelor of Computer Applications (BCA) <i>College of Commerce, Arts and Science, Patna</i>	2021 – 2024 Patliputra University
Intermediate (Class XII) <i>St. Ann’s High School, Patna</i>	2019 – 2021 CBSE Board

Licenses and Certifications

- Walmart USA – Advanced Software Engineering Job Simulation (*Forage, May 2026*)
- Deloitte Australia – Technology Job Simulation (*Forage, Jun 2025*)
- Complete Data Science, Machine Learning, Deep Learning and NLP Bootcamp (*Udemy, Feb 2026*)
- GitHub Copilot Certification Preparation (*LinkedIn Learning, May 2026*)
- Getting Started as a Full-Stack Web Developer (*LinkedIn Learning, May 2026*)
